

The future energy infrastructure, including renewable technologies and cleaner power and fuel systems, not only provides significant opportunities to replace or decarbonize the energy sector, but it is also expected to create more jobs than fossil fuel equivalent technologies.

Preparing people for new careers, re-skilling and upskilling measures will be vital for extending the employment benefits of the transition along the value chain and in the wider economy to EU citizens.

TRANSIT (TRANSITION to sustainable future through training and education) is a project funded by the European Union under the program Horizon Europe that aims to provide sustainable training and re-skilling programmes for current and future generations on a multidisciplinary approach in renewable energy.

In achieving this, TRANSIT seeks to enable the societal changes that will encompass the high ambitions of deployment and transformation of the energy sector in the following decades through the design and delivering of an overall educational, retraining and social engagement programme covering different sectoral strategies and stakeholders.

Info

PROJECT NAME: TRANSITION to Sustainable Future through Training and Education

PROJECT ACRONYM: TRANSIT

PROJECT EU NUMBER: 101075747

PROJECT UKRI NUMBER: 10053168

DURATION: Oct. 2022 to Sept. 2025

BUDGET: 2,5 M€

CALL: HORIZON-CL5-2021-D3-02-02

COORDINATOR: Dr Ing. Brian Azzopardi

EMAIL: info@transitproject.eu
